Process order confirmation automatically

confirmation**LINE**

confirmationLINE offers you:

✓ Certified process solution, completely mapped in SAP

✓ Free-form recognition, integrated in SAP

✓ Fehlerfreier Bestellbestätigungsprozess durch vollste Automatisierung

✓ Individual workflows – all release logics are covered

Your order confirmation process is not transparent?

With confirmationLINE, order confirmations from suppliers can be processed automatically. The range of functions extends from free-form recognition, transfer of order confirmations received by e-mail, post-processing completely integrated in SAP through to information workflow in case of differences.

With our best-practices-standard, we have a perfect solution for mid-sized companies and large corporations: a high functional scope. Complete SAP integration. Fast implementation. Individual customizing.

SAP® Certified
Powered by SAP NetWeaver®

Core process confirmationLINE – this is how it works:

Recognition & Validation

Post-processing of the order confirmation

Order confirmation receipt

Setting the processes in workCENTER

Release & Completion of the process

Benefits of confirmationLINE

☑ Decrease of process costs thanks to less manual work

☑ Central monitoring for maximum transparency

☑ Automate processing of further documets e.g. delivery schedules

☑ No interfaces – the complete process takes place in SAP

☑ Familiar work environment for your employees

☑ Can be integrated in SAP ERP ECC and SAP S/4HANA

> "In order to provide our customers with a standardized and yet individual order confirmation process within their SAP system, we also offer some extensions. This makes it possible for us to respond to the specific requirements of each individual customer. With confirmationLINE, we offer the only solution on the market that is fully integrated into the SAP system."
