Process orders automatically
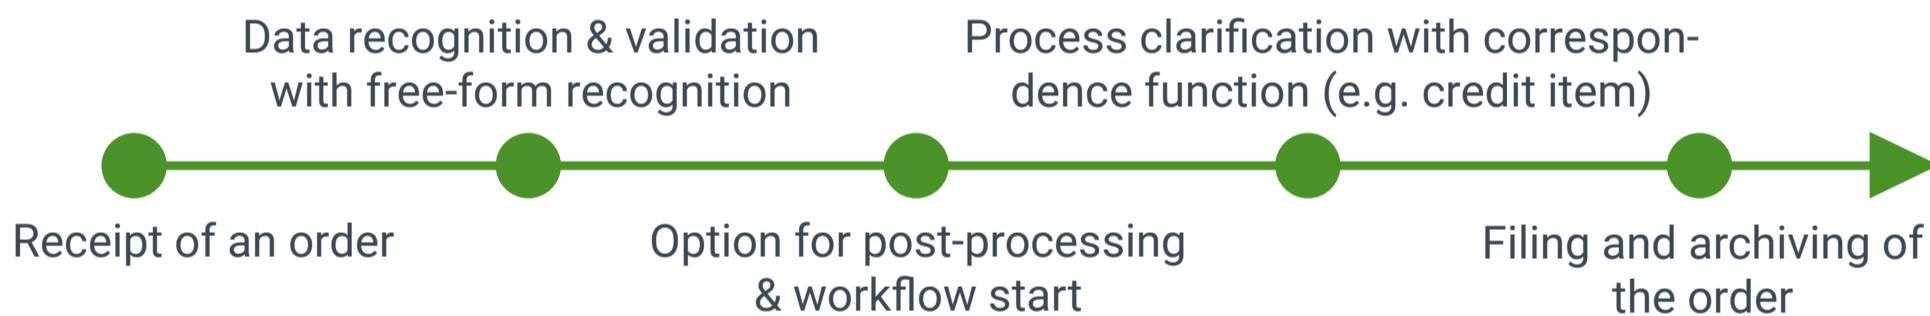

*ordering*LINE

What orderingLINE has to offer:

- ✓ Certified process solution fully integrated into SAP

- ✓ SAP-integrated free-form recognition

- ✓ Flexible workflow strategies and direct correspondence function

- ✓ Central post-processing and automatic filing of orders in SAP

The processing of orders is time consuming and done manually in your company?

Incoming orders can be processed automatically with orderingLINE. A key feature is the comprehensive integration into SAP, including free-form recognition, which prevents system interruptions and ensures high process security. Benefit from archiving and coupling of all documents to the SAP invoice. Besides the processing of paper-based orders, orderingLINE also supports the linking of additional entry channels (e-mail or other electronic formats). Company-specific adjustments can be made through flexible customizing.

SAP® Certified
Powered by SAP NetWeaver®
