Your fully automated purchase-to-pay process

From purchase to paying your invoice

dunning letters

Incoming dunning letters are automatically processed with **dunningLINE** and tied to the corresponding invoice.

1. Needs assessment and

dentification

The p2p process starts by assessing the need of a lacking resource that must be purchased from a supplier.

5. Receipt and processing

of the invoice

Using **invoiceLINE**, your incoming invoices are digitalised in SAP and automatically linked to the order.

p2p by flowDOCS

2. Validation of needs by

purchasing

Purchasing can easily confirm or add to the needed resources in a workflow illustrated in SAP.

3. Offer receipt and automatic

processing

Incoming offers are recorded with offeringLINE and automatically allocated to the corresponding request. The SAP add-on for online VAT-ID check automatically examines the VAT identification number of your new suppliers.

4. Order and processing of order confirmations

Incoming order confirmations are automatically transferred to your SAP system with **confirmationLINE** and linked to the corresponding order. A sleeker alternative is the SAP add-on for **automatic order confirmations via AIF**.

Your benefits from the p2pPROCESS

Full automation. Simple workflows. Accelerated processes.

With the p2pPROCESS by flowDOCS, you can digitalise your p2p process from the needs assessment to the receipt of invoices (or dunning letters) and fully illustrate it in your SAP system.

Increased transparency

Digitalising your entire p2p process, you gain significantly higher transparency.

Accelerated processe

The automation of processes allows your staff to collaborate more efficiently and faster.

Fewer errors

Your staff are guided through the processes, which results in fewer mistakes.

Comprehensive process

You gain a comprehensive process that is fully integrated into SAP – from the needs assessment to incoming dunning letters.

Directly in your SAP system

Everything is directly integrated into your SAP systems, which means no media interruptions or interfaces that slow down your processes.

Competitive advantage

You can respond faster to legal changes and collaborate flexibly both internally and externally.
